*Acknowledgement*

Receipt is acknowledged of the Amendment filed October 11, 2005.

*Reasons for Allowance*

Claims 15-20 and 23-34 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Watanabe, taken alone or in combination of other references, does not teach or fairly suggest a circuit comprising, among other things, a switched-capacitor sampling circuit, wherein the switched-capacitor sampling circuit includes a capacitor having a first node and a second node, and wherein the first node is coupled to the switch and the second node is coupled to the output of the sampling circuit (claims 15 and 34); and a buffer including a source-follower transistor adapted to generate an output signal from an input signal, a replica transistor adapted to generate a replica signal from the input signal, and a level shifting circuit that provides a level-shifted replica signal at a terminal of the source-follower transistor (claim 18), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
